VORTEX™ HOSE AND COUPLING SPARES

VORTEX™ HOSE AND COUPLING SPARES

VORTEX™ COUPLING STRAIGHT

Vortex™ QRC Coupling with integral hose tail. Available for spares as a complete coupling or as individual spare parts.

VORTEX™ COUPLING 90 DEGREE

Vortex™ QRC 90 °Coupling with integral hose tail. Available for spares as a complete coupling or as individual spare parts.

VORTEX™ SEAL KITS

All Vortex™ Couplings are fully serviceable and easy to maintain.
A full range of Vortex™ seal kits are available from stock.

VORTEX™ THREADED FITTINGS

Vortex™ threaded fittings have an internally screwed hose tail which secures the Vortex™ internal support spring in place, providing maximum support between the internal support spring and outer hose assembly, preventing the possibility of hose collapse vacuum/pressure.
Available with BSPT, BSPP and NPT thread form in mild steel or stainless steel.

VORTEX™ INTERNAL SUPPORT SPRING

Vortex™ internal support spring prevents the outer silicone hose from collapsing whilst under vacuum/pressure.
Available is open or closed coil form.

VORTEX™ HOSE FERRULE

Vortex™ hose ferrules are strong but lightweight ferrules used to securely hold the coupling or fitting hose tail in place. The hose ferrule is crimped down to size using either a hand press or powered swaging machine.

VORTEX™ EXTERNAL SUPPORT SPRINGS

Vortex™ external support springs provide support to the swaged area of the hose, preventing kinking of the most venerable are of the hose assembly.
